

# Horrible WIFI

While visiting your venue, I found the provided WiFi network horrible enough to have filled out this form. Please improve the WiFi to save other guests from having the same experience.

**Volume Limit**

You have a volume limit, and the volume is laughably small.

**Low Bandwidth**

The bandwidth is so bad, my phone's connection is faster.

**Device Limit**

You think people only want to use one device.

**Blocked Ports**

Some ports are blocked, breaking services.

**Captive Portal Breaks Webpages**

The captive portal is buggy and breaks websites even after logging in.

**Re-Auth on Disconnect**

After disconnecting, one needs to re-authenticate.

**Requires Personal Data**

I need to provide personal data, which you already have and should not require.

**Extra Charges**

You think it's okay to charge extra money for (faster) internet.

**High Latency**

The latency is so bad that websites don't load.

**No IPv6**

IPv6 is not available on your WiFi.
